

 no academic level required

 2 ECTS

 14 days

Who is eligible?

Students over 18 years old,
Professors, university staffs etc.

Services

English-taught program
Conferences, workshops, courses, visits of companies, study projects
Cultural discoveries & touristic activities
Accommodation: Youth hostels, host families (2 students per room)
Full board
Local transfers
Insurances and SIM card

Cost

Costs include all activities and services above.
Visa, international flights and extras are not included.

Cost of the 14-day Bootcamp program

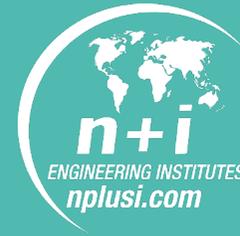

EUR 2 400¹

Starting date (arrival in Nice): June 5th, 2027 (to June 18th, 2027)

(1) Please note that all prices are valid for 2026 and can be revised
Program is subjected to change according to availability of visits

Bootcamp in Sustainable Development & Energy

14 days
in France
June 5-18, 2027

Environment and Energy in the 21st Century: France's Challenge in Paris and the French Riviera

content of the program, field, dates
tailor made for 12+ participants

Objective

To offer students a unique opportunity to discover France and to get a life-changing experience in science and technology applied to sustainable development and energy.

Organised by Network n+i

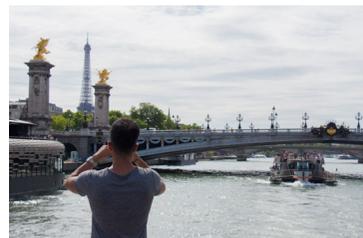

The Network "n+i", a non for profit association, is a consortium of French top engineering institutions (Grandes Ecoles d'Ingénieurs).

These schools have elected to combine their international cooperation operations in order to offer a range of services to help students in their study abroad projects.

Associated partners

CESI is an engineering institute member of Network n+i deeply involved in sustainable development and artificial intelligence.

Program overview

provisional program

Enhance your knowledge of future technologies to preserve the environment

- Artificial Intelligence in environment
- Perfume & fragrances factory & lab
- Urban district heating
- Energy recovery of domestic waste
- Expert from Observatory for Air Quality & Ballon de Paris, world's largest balloon
- Sustainable low carbon concrete and recycling services
- Operational agency to adapt climate change and energy transition
- Conference on urban transportation & mass transit
- Management of public lighting in the City of Light
- Citizen-led and local cooperative of renewable electricity
- Unique management practices for water distribution
- A swimming pool heated by datacenters
- Urban farming & connected beehives
- Musée des arts et métiers, museum of technological innovation

Cultural activities:

- Cruise on the Seine river
- The Palace of Versailles
- Promenade des Anglais in Nice
- Discovery of Monaco and/or Italy

350 study programs

35 engineering institutes
