Application & selection process

- One single application on line
- Selection process by 50 institutes
- Student receives multiple admission offers
- Student accepts one offer and quotation
- Student joins coaching and training programs

50 engineering institutes

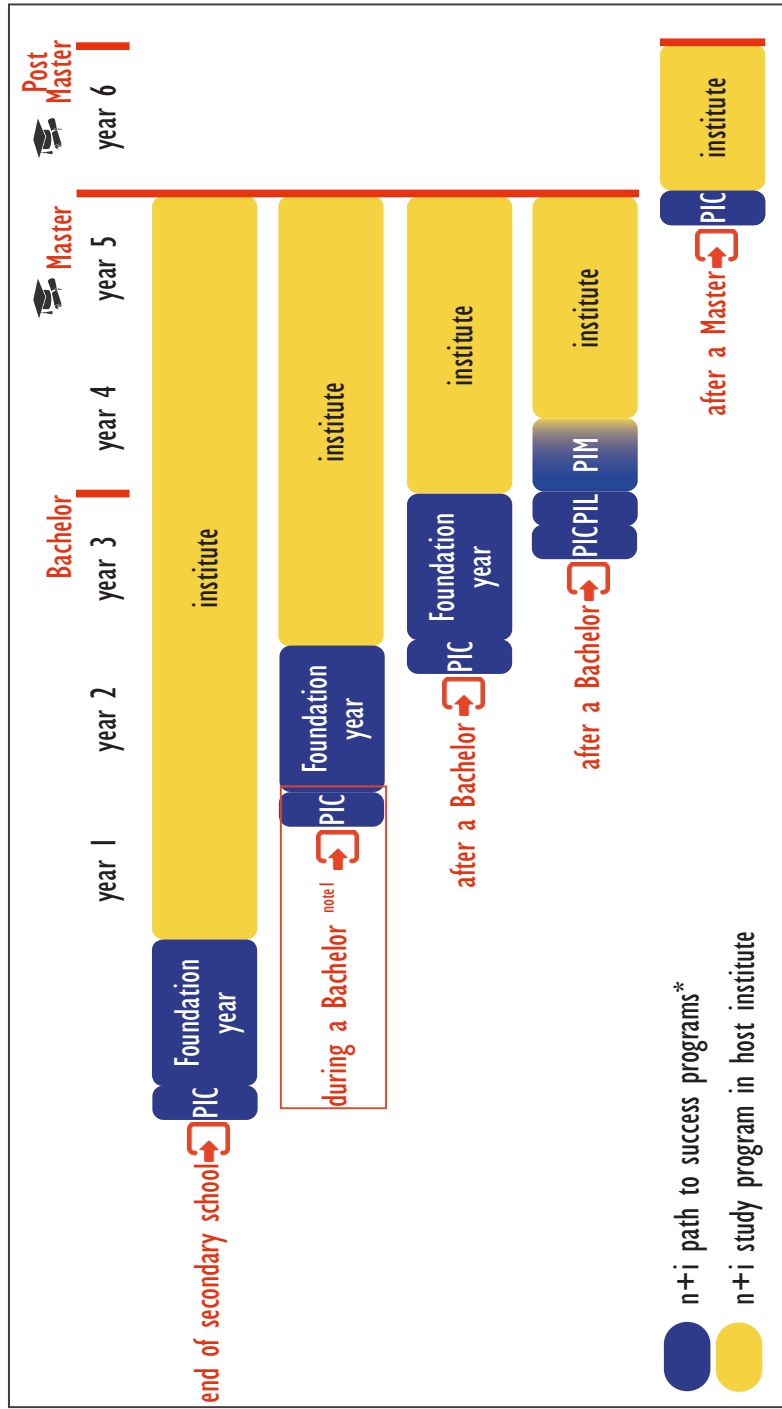

Prepare for
an international career

1 Single Application

500 Masters & Post-Masters in all scientific & technologies areas

The n+i consortium offers a unique choice of Degree leading & coaching programs

"n+i" programs are adapted to your personal academic background

"n+i" Degree leading programs

more than 500 study programs proposed by 50 engineering institutes

Masters

Master degrees in Science and Engineering are accredited programs awarded to students admitted at different levels:

- after secondary school through a 1+5 years program
- for undergraduates through a 1+3 program
- for graduates through either a 2 year or a 1+2 year program

Advanced Masters

The Advanced Master programs are post-MSc training courses accredited by the "Conférence des grandes écoles (CGE)" which holds exclusive rights to the label: Mastère®. They provide specialized training through a one year program.

Check availability of each program on: www.nplusi.com

Preparatory programs: "n+i" path to success

Depending upon the training program students are selected for and the academic decision of the host institute (one or more programs can be required)

Foundation year

- Upgrade your performance in French and/or English language,
- Secure your knowledge of science fundamentals
- Improve your learning methodology.

Welcome and Discovery Package - WDP

- Welcome package at your arrival in France
- Assistance 24/24
- Insurances (health, civil liability) from the first day
- Transfers are organized for you

Package for Linguistic Integration - PIL

- Intensive French course period provided in centers certified «FLE quality»
- Accommodation in family to boost the knowledge of the French language and culture.
- Duration can be adapted upon request

Package for Methodological Integration - PIM

- A period of adaptation without extra time for the master program in 2 years
- Courses of : methodology, french scientific language, scientific courses, mentorship
- Credited with 30 ECTS upon the 120 ECTS of the master program
